LIEUTENANT
J W TYRIE
Royal Navy

COMMADING OFFICER
HMS SCIMITAR

Born and raised in Cheshire, Josh left school to study Geography and Glaciology at Aberystwyth University.

Joining the Royal Navy in May 2015 as a Warfare Officer within the Hydrographic and Meteorological (HM) branch, he left Britannia Royal Naval College a year later to begin his Young Officer (YO) training. Having trained on both Frigates and Destroyers, most of his YO training took place on board OPVs HMS Clyde in the Falkland Isles, including a trip to South Africa and HMS Mersey in UK waters.

Following the completion of his Officer Of the Watch training, Josh spent a further year completing his HM training becoming a Cat B Hydrographic Surveyor and a meteorological and oceanographic specialist.

His first complement assignment was to HMS SCOTT, a deep water Ocean Survey Vessel as the Gunnery Officer, helping survey the Atlantic Ocean as well as time conducting Falkland Isles Patrol duties.

On completion of PNO course in 2020 he became the OiC of Project HELCA in Devonport, assisting the RN to develop it's autonomous survey program, before successful selection for Small Vessel Command. He assumed Command of HMS Scimitar in March 2021.

Josh enjoys spending his free time travelling on his motorbike, horse riding and running to keep fit.
