

MEDICAL

MEDICAL ASSISTANT (SUBMARINER)

As a Medical Assistant (Submariner), your place in the team is so important that the submarine literally can't leave port unless you're on board. But your role goes much further than just being a medic and providing health education. All Royal Navy submarines are nuclear-powered and you'll be responsible for monitoring air and water supplies and carrying out vital health and environmental safety checks. As the radiation safety expert on board, you'll report your findings direct to the Commanding Officer and advise on what action should be taken. You'll also be trained in advanced first aid and lifesaving. The people around you won't just be patients, they'll be your crewmates and their lives could, literally, depend on your skills.

What we're looking for

You'll need commitment, enthusiasm and common sense. You should also be interested in people and have a desire to care for the sick and injured. It's crucial that you can stay calm, but react quickly in an emergency. Above all, you need to work well as part of a team. Serving on board a submarine takes a special type of person. You need to be able to live and work in a confined space, where the conditions can quickly change from relatively calm to extremely active and exciting.

Initial training

Your Royal Navy career begins with 10 weeks' basic training at HMS Raleigh. It sounds like a ship, but in fact it's a shore base near Plymouth. The discipline, teamwork, organisational, firefighting and weapon-handling skills you'll learn here will stay with you right through your Royal Navy career. Aim to get yourself as fit as you can before you arrive. You'll be doing a lot of physical exercise, and you'll find it much easier if you're already in good shape. There's also a swimming test, so if you can't swim, make sure you've learned by the time you join us. You can find out more about HMS Raleigh at royalnavy.mod.uk/careers

Professional training

Your medical training will take place at the Defence Medical Services Training Group, Aldershot, where you will spend an initial 20 weeks studying first aid, environmental and preventative medicine, anatomy and physiology, administration and pharmacy. When you finish, you'll be awarded the distinctive red Geneva Cross. After another 19 weeks' training including gaining practical experience in a hospital, where you'll work on various wards and departments with ill and traumatised patients, you'll sit your final exam to become a Medical Assistant. After finishing your medical training, you will spend two months at the Nuclear Department at HMS Sultan in Gosport. This is where you will be trained in radiation protection, chemistry, environmental science and atmosphere control, which is followed by two weeks spent in Her Majesty's Naval Base (HMNB) Clyde, the home of the UK's Nuclear Deterrent Submarines. After successfully completing this training, you will be awarded the City and Guilds Stage 1 in Radiation Safety Practices. You will build upon this qualification throughout your career. You will then join the Submarine School in HMS Raleigh to learn about how submarines operate – how they function as a vessel under water and their nuclear propulsion system. After further specific training at either HMNB Devonport in Plymouth or HMNB Clyde in Scotland, you will go to sea for the first time on a submarine. This is where you will have a final assessment before being awarded your highly respected set of 'Dolphins'.

Skills for life

Training will be a constant feature of your time with us. We'll help you gain academic qualifications like GCSEs, A-levels, even a degree. You can also work towards NVQs and other vocational awards. As well as helping you develop your Royal Navy career, everything you achieve will be recognised and valued by a future civilian employer.

Promotion

You'll start your career as an Able Rate. With some experience and further training, you could be promoted to Leading Hand. After that, you may go on to become a Petty Officer, Chief Petty Officer then a Warrant Officer. If you show the right commitment, skills and academic ability, you may also have the chance to become a Commissioned Officer. You'll be chosen for promotion on merit, so if you work hard, you can quickly rise through the ranks.

Pay and conditions

Royal Navy pay compares well with similar civilian jobs. As well as basic pay, you'll get extra money for special skills, when you're promoted and when you're away at sea. As a Submariner, you'll qualify for a bonus of £5000 when you're awarded your 'Dolphins'. We also offer an excellent pension scheme, six weeks' paid holiday a year and free medical and dental care. You'll generally join us on a full career, which is 18 years or to age 40, whichever is later. You may have the opportunity to serve beyond this, depending on what you want and the needs of the Royal Navy. If you want to leave, you can send us your request one year before completing your specified return of service. How long this return of service is, will depend on the branch you join. You will need to give 12 months' notice.

Not just a job, a way of life

There is a lot more to joining the Royal Navy than doing a job. For a start, all our ships and shore bases have superb sports and fitness facilities. We can offer a fantastic range of sports and other activities. You'll also have the chance to go on adventurous training, which could be anything from a jungle expedition to mountaineering and caving to parachuting. From the moment you join, you'll be part of a team that lives, works and relaxes together, forming friendships and experiences that can last a lifetime. It's a unique way of life, and the opportunities we offer will allow you to reach your career potential and enjoy the time you spend with us to the full.

DO I QUALIFY?

MEDICAL ASSISTANT (SUBMARINER)

Age:	17 to 36.
Nationality:	Full British citizenship.
Qualifications:	No specific qualifications are needed for this job.
Sex:	This job is open to men only.
