

# ENGINEERING

## AIR ENGINEERING TECHNICIAN

As a vital part of our air operations team, you'll take charge of scheduled maintenance and pre- and post-flight servicing and inspections for the Fleet Air Arm's helicopters and fast jets. You could serve on board a frigate, destroyer, aircraft carrier, at a Royal Naval Air Station (RNAS) or with a front-line squadron based overseas. Later in your career, you'll have the chance to specialise in mechanical technology, such as airframes, engines, control and fuel systems, or avionics, including radar, communications, weapons and electronic warfare systems.

### What we're looking for

You'll need commitment, enthusiasm and common sense. You should also have some mathematical ability, communication skills and an interest in systems – all of which you can develop during your training.

### Basic training

Your Royal Navy career begins with nine weeks' basic training at HMS Raleigh. It sounds like a ship, but in fact it's a shore base near Plymouth. The discipline, teamwork, organisational, firefighting and weapon-handling skills you'll learn here will stay with you right through your Royal Navy career.

Aim to get yourself as fit as you can before you arrive. You'll be doing a lot of physical exercise, and you'll find it much easier if you're already in good shape. There's also a swimming test, so if you can't swim, make sure you've learned by the time you join us. You can find out more about HMS Raleigh at [royalnavy.mod.uk/careers](http://royalnavy.mod.uk/careers)

### Professional training

You'll complete six months' professional training at the Defence College of Aeronautical Engineering at HMS Sultan in Gosport, before being posted to your first operational squadron.

### Pay and conditions

Royal Navy pay compares well with similar civilian jobs. As well as basic pay, you'll get extra money for special skills, when you're promoted and when you're away at sea. We also offer an excellent pension scheme, six weeks' paid holiday a year and free medical and dental care.

You'll generally join us on a full career, which is 18 years or to age 40, whichever is later. You may have the opportunity to serve beyond this, depending on what you want and the needs of the Royal Navy. If you want to leave, you can send us your request one year before completing your specified return of service. How long this return of service is, will depend on the branch you join. You will need to give 12 months' notice.

### Promotion

You'll start your career as an Able Rate. With some experience and further training, you could be promoted to Leading Hand. After that, you may go on to become a Petty Officer, Chief Petty Officer, then a Warrant Officer. If you show the right commitment, skills and academic ability, you may also have the chance to become a Commissioned Officer. You'll be chosen for promotion on merit, so if you work hard, you can quickly rise through the ranks.

### Skills for life

Training will be a constant feature of your time with us. We'll help you gain academic qualifications like GCSEs, A-levels, even a degree. You can also work towards NVQs and other vocational awards. As well as helping you develop your Royal Navy career, everything you achieve will be recognised and valued by a future civilian employer.

### Sport and recreation

We can offer you a fantastic range of sports and other activities. All our ships and shore bases have superb sports and fitness facilities and we play a huge number of team and individual games. You'll also have the chance to go on adventurous training, which could be anything from a jungle expedition to mountaineering and caving to parachuting.

## DO I QUALIFY?

### AIR ENGINEERING TECHNICIAN

<b>Age:</b>	16 to 36.
<b>Nationality:</b>	British or British dual citizenship.
<b>Qualifications:</b>	No specific qualifications are needed for this job. However, fast-track opportunities may be available if you have GCSEs or Scottish Standard grades or equivalent or A-levels or Higher grades or equivalent.
