

**Duration**

½ day
theory only

Max capacity

32 personnel
(SNCO to
Senior officer of
warfare and/or
aviation branch)

IDT MTT - EMBARKED AVIATION

AIM OF SUBJECT

This subject will provide International Maritime Student (IMS) with the information and knowledge to conduct flying operations at sea. It will look at the paramount aviation safety procedures as well as military operating procedures to ensure safe, effective and efficient aviation warfare support.

OUTLINE SYLLABUS

The subject will consist of presentations of:

- ◆ Roles and capabilities of embarked aviation assets
- ◆ The organisation and Command and Control
- ◆ Authority of the flight Commander
- ◆ Importance of aviation safety pre-, during and post flying operations
- ◆ Conduct of flying including preparation, movement, launching, flying and landing of aircraft

EXAMINATIONS/QUALIFICATIONS GAINED

On completion the IMS will be able to:

- ◆ Understand the embarked aviation operations
- ◆ Understand the command and control of embarked aviation operations
- ◆ Understand the safety and operational aspects of embarked aviation procedures
